

Video Cassette Recorder

VRZ242AT

Four-Head Video Cassette Recorder with VCR Plus+™ Programming

- Four-head, double azimuth design
- Front audio/video jacks
- LED clock display
- Slow motion
- Time search
- Auto head cleaner
- Digital auto tracking
- Real time counter
- Universal TV/CBL/DBS remote control

Full Auto-Feature Package

- Power on
- Auto play
- Auto repeat
- Auto rewind
- Auto eject
- Auto power off

Let's make things better.

PHILIPS MAGNAVOX

Programming & Record/Playback Features

VCR Plus+™ Programming

Simplifies VCR programming by allowing you to simply enter PlusCode® programming numbers found in many published television listings. When recording begins, your VCR automatically selects the proper TV channel and program length. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

One-Touch Record

Record up to 8 hours or to the end of the tape with the touch of a single button. Each touch of the OTR button adds 30 minutes of additional recording time.

8-Event/1-Year Smart Programming

Program your VCR for unattended recording of up to 8 separate programs over a full 365-day period. No manual setting, adjusting, or programming of the calendar function is required.

Remote Control Onscreen Menu Programming

Program by remote control for unattended recording, with programming instructions onscreen for visual verification. Onscreen menus lead you through normal, daily, or weekly programming by program number, channel to be recorded, start and stop times, speed, and date of recording by day, month, and year. Pressing the CLEAR button lets you go back and reprogram over mistakes, and pressing the MENU button at the end of programming verifies that instructions are locked into memory.

Picture

4-Head, Double Azimuth Design

Combines direct drive cylinder and capstan motors with precision digital servo control to produce excellent special effects reproduction in Still and Slow modes in both SP and SLP speeds.

Digital Auto Tracking System

When tape playback begins, this feature automatically seeks the optimum tracking position in the tracking range, and the optimum audio signal tracking position for clearest picture and sound. Buttons on the remote transmitter give you manual control should tracking adjustments be necessary.

Auto Head Cleaner

Gently, automatically cleans the video heads each time a tape is inserted or removed to maintain optimum picture performance during both recording and playback.

Convenience

Daylight Savings Timer

This menu-driven feature automatically compensates for Daylight Savings Time changes in early April and late October so you don't have to reset the clock twice a year. Simply activate the Daylight Savings Time option in the Set Clock menu and forget it!

Automatic Channel Setup

The VCR tuner scans through television frequencies, automatically storing active broadcast channel into memory. Then, only active channels programmed into memory are tuned using the CHANNEL ▲ ▼ buttons on either the remote or front panel of the VCR. Automatic channel preset can be repeated whenever desired, should new channels become available. Channels can be manually added or deleted.

RCA is a trademark of Thomson Consumer Electronics
SONY is a trademark of Sony Electronics, Inc.

Front Panel Audio/Video Inputs

Provide added convenience to the user when recording tapes directly from a camcorder to the VCR. In addition, accessory video equipment such as a video game or Web browser can be connected for direct playthrough to the TV set.

181-Channel FS Tuning

The digital quartz tuner can receive up to 181 channels, including UHF, VHF, and 113 cable channels, without the inconvenience and expense of a cable company decoder/converter (on non-scrambled cable systems). Channel tuning is by random access with the remote control transmitter or scan tuning up and down by remote or at the set.

Clock/Function Display

Bilingual (English/Spanish) Onscreen Function Display

Onscreen Real-Time Counter with Time Search

Timer/Programmer Back-up System

Repeat Play

Quick Start Mechanism

Audio/Video Input/Output Jacks

Special Effects

15x Forward/Reverse Latching Search

Search in forward or reverse mode at 15 times normal playing speed in SLP. The Latching Search feature provides continuous forward or reverse search with a single touch of the control. A second touch stops the search operation and returns the unit to the Play mode.

Remote Control

VCR/Universal TV/CBL/DBS Remote

Multifunction infrared remote controls all operating features and functions of this VCR, plus select functions of most Philips Magnavox and some competitive brand television sets, as well as some cable converter/decoders, and standard features of MAGNAVOX, RCA, and SONY digital broadcast satellite receivers. Change channels fast with the numeric direct access keypad and heads-up onscreen display for confirmation.

Full Auto-Feature Package

- Power On
- Digital Auto Tracking
- Auto Play
- Auto Repeat
- Auto Rewind
- Auto Eject
- Auto Power Off
